GENERAL REVIEW.

Mr. Charles D. Hamill, President, Board of Trade of the City of Chicago:

Sir—I have the honor to hand you herewith the Thirty-Sixth Annual Report of the Board of Trade of the City of Chicago.

The year 1893 was in its commercial features altogether exceptional. It opened with fair business prospects, and during its earlier months industries were conducted upon the same profitable basis as throughout the preceding year. In the early summer there was evident a pervading distrust in financial circles and a general disposition to restrict business and to abstain from new enterprises. This distrust assumed an alarming aspect and the stringency of the money market and the uncertainty of national, financial and tariff legislation induced many industries to curtail their business and others to shut down. This threw a large number of men out of employment. The exceptional and serious situation addressed itself to the philanthropic and public-spirited citizenship of the country, and the unemployed were provided with food and work to such an extent that there was, considering the gravity of the situation, comparatively little distress. business and social interests of the country addressed themselves with a determined unanimity to the situation, and with remarkable alacrity conformed to the new conditions. Individual and business expenses were systematically and resolutely reduced. Obligations incurred by business men were to a gratifying extent, under existing circumstances, liquidated or extended. It is evidently the purpose of merchants not to change this policy but to address themselves for some time to come to the economical conduct of their business, and to discourage new projects until the financial situation has so far recovered and is to such a degree assured, as to justify them in re-opening their industries and in extending their operations. Permanent recovery must be gradual and along the line of universal persistent economy, and will be observed in relatively diminished imports, in the conservative conduct of business generally, in restricted purchase of luxuries, in cautious speculation and in the resumption of sound and careful business methods which have of late years too often been ignored. Under such a policy it is inevitable that confidence, which is the important thing to be accomplished, will be restored and manufacturing will be revived. Those thrown out of employment will find work, and money will again vitalize the great arteries of commerce. will not be excessive gold exports and the currency of the country will be established upon a stable foundation. It is not my purpose to enter at length into the causes of the conditions thus brought It may, however, be pertinent to state that these were the result of a distrust which existed for many years, occasioned principally by the national policy in relation to the use of silver as money—a distrust more pronounced in Europe than in this country, causing at periods of financial stress, blocks of American securities to be sent to the United States for redemption and sale, materially depleting our gold reserve, and thus increasing the forebodings of our financiers and merchants.

With full supplies of raw products at prices unprecedentedly low and a steadily enlarging consumptive demand, the prospect for 1894 is more promising than was that of its predecessor, especially as the cycle of depression following the Baring collapse of 1890 is showing signs of exhaustion.

It is gratifying to observe that in the midst of generally adverse surroundings, while many industries were crippled and some even paralyzed, the business of our members, dealing as they do in the necessities of life, was not seriously impaired.

The Financial Chronicle of October 23d, 1893, gave the following estimates of the world's wheat crop for 1893:

Corn Trade List (Beerbohm), 2,251,600,000 bushels.

Corn Trade News (Broomhall), 2,213,000,000 bushels.

Estimate of the Hungarian Minister, 2,279,000,000 bushels.

Mr. Broomhall includes 12,000,000 bushels from Mexico that other estimates take no account of, nor does Mr. Beerbohm give the Japanese wheat crop. The Department of Agriculture of the United States estimates the annual average wheat crop of the world at about 2,281,000,000 bushels. This shows that the crop of 1893 is about an average one.

The estimate of the world's wheat supply furnished by the special London correspondent of the Chicago Board of Trade is as follows:

	BUSHELS.	1	BUSHELS.
Austria	44,016,000	Algeria	14,400,000
Hungary	156,544,000	Tunis	8,400,000

A difference among the estimates, after making the proper allowances of thirty or forty million bushels, shows a near approach to agreement in a matter where the opportunities of difference are great.

In this connection, the following, taken from the report of the Hungarian Minister of Agriculture, is interesting:

```
Great Britian produced 56,750,000 bush's and imported 184,427,000 bushels. France "283,764,000 " " "46,818,000 " Germany "90,795,000 " " "25,537,000 " Italy "122,012,000 " " "22,700,000 " Austria "45,400,000 " " "39,725,000 "

The wheat harvest of all European countries requiring imports of grain, is placed at 721,070,000 bushels.

Whence these requirements will be satisfied, says the Chief of the Bureau of Statistics, is even more a matter of conjecture than crop results. The United States crop of 1893 was below the average as were also the wheat crops of the leading exporting countries of Europe. From the London Economist I take the following figures which were presented at the corn market at Vienna:

India's produce was 7,149,000 tons of wheat against 5,535,000 tons in 1892, the average harvest being 6,500,000 tons. The United States of America produced 516,000,000 bushels in 1892, and 396,000,000 bushels in 1893; of rye there were 32,000,000 bushels last year and 27,000,000 this year.

CROPS OF THE CHIEF CEREALS.

The chief grain crops of the country, comprising grain, wheat and oats, aggregated during the last year 2,654,482,706 bushels,

as compared with 2,805,448,000 bushels for the year preceding, showing a decrease, in round numbers, of 151,000,000 bushels, 120,000,000 bushels of this difference being accounted for in the crop of wheat.

WHEAT.

The crop of wheat for the year 1893 aggregated 396,131,725 bushels, grown on 34,629,418 acres, valued at \$213,171,381 as against 515,949,000 bushels produced on 38,554,430 acres, valued at \$322,111,881 in 1892. The average farm price per bushel is estimated by the Agricultural Department at 53.8 cents, making an average farm value per acre of \$6.16 which is \$6.84 less than the average value per acre for the period 1870–79, \$3.81 less than the average for the decade 1880–89, and \$3.11 below the average for the four years 1890–93 inclusive.

CORN.

The production of corn for the year was 1,619,496,131 bushels, grown on 72,036,465 acres, valued at \$591,625,627, as against 1,628,464,000 bushels produced on 70,626,658 acres, valued at \$642,146,639 in 1892. The yield per acre was 22.5 bushels, the lowest for ten years excepting the years 1886, 1887 and 1890. The average value per bushel was 36.5 cents which is 2.9 cents less than that of 1892.

OATS

The crop of oats raised during the year 1893 aggregated 638,854,850 bushels, grown on 27,273,233 acres, valued at \$187,576,092, the same being 22,180,000 bushels less than the crop raised in 1892, and showing a reduction in value of about \$21,700,000. The average yield per acre was 23.4 bushels as against 24.4 bushels in 1892 and is a trifle more than three bushels less than the average yield for the ten years from 1880–89. The average value per acre was \$6.88, the lowest since 1889, and is \$1.34 less than that of the decade 1880–89.

In this volume may be found detailed statements of the crops of rye, barley and buckwheat. No official statements have been made by the statistician of the United States Department of Agriculture of these crops since 1888, until this year.

NUMBER OF ANIMALS ON THE FARMS OF THE COUNTRY.

The number of animals on the farms of the country including horses, mules, milch cows, oxen and other cattle, sheep and hogs, was 161,783,453, valued at \$2,170,816,754, against 164,284,573, valued at \$2,483,506,681 in January, 1893, and 169,216,813, valued a \$2,461,755,678 on the corresponding date of 1892. The scarcity of feed in addition to the general financial depression is assigned as an important factor in accounting for the decline both in the number and value of farm animals.

A detailed statement by states and territories, concerning these various animals together with estimates of their value and average price, may be found in the statistical portion of this volume. The price of sheep has declined notwithstanding the decline in numbers. The price of hogs is also less than that of the year preceding but many indications favor a rapid recovery. A decline of 21.9 per cent. has taken place in the price of horses and 12 per cent. in the price of mules.

FOREIGN COMMERCE.

The value of our imports of merchandise during the fiscal year ended June 30, 1893, was \$866,400,922; of gold \$21,174,381; of silver \$23,193,252. The value of our exports of merchandise was \$847,665,194; of gold \$108,680,844; of silver \$40,737,319. value of our export and import trade aggregated therefore \$1,714,-The value of our imports of merchandise was greater than that of any year in our commercial history, and during no other year since the formation of the government has the export of gold reached a higher figure than during the year 1893. record of the movement of gold renders the year 1893 exceptionally prominent in its financial and commercial history. proach to these figures was during the year 1864 when the export of gold amounted to \$100,661,634, and was clearly ascribable to the years of war waged for the maintenance of the Union, and to the political and commercial upheavals which attended that conflict and followed its close.

The following statement shows the exports of gold from the United States to principal countries during the fiscal years from 1889 to 1893.

The value of our in-transit and trans-shipment trade for the year amounted to \$67,949,837, and should not be considered a part of the value of our foreign commerce as the country merely derives from the merchandise represented by this amount the carrying charges incident to its transportation across American soil and upon American waters.

The value of exports of domestic products aggregated \$673,-007,667, of which the products of agriculture comprised 74.5 per cent. The value of exports of manufactures aggregated \$158,-023,118, representing 19.2 of domestic exports.

The following official statement is submitted, showing the value of exports of provisions, exhibiting the course of commerce in bacon and hams, pork, lard, meat and dairy products since 1860:

CHICAGO.

The City of Chicago has an area of 186.2 square miles, or 119,168 acres; the population is 1,700,000.

The total bonded indebtedness of the city is \$18,426,450.

There are 2,467 miles of streets in the city of which 1,007 miles are paved; there are 4,252 miles of sidewalks; 1,145 miles of sewers and 1,474 miles of water-mains.

During the year there were 8,359 buildings erected, valued at \$28,708,750.

Chicago has 251 school buildings and rents 95 buildings for school purposes. The average daily attendance is 152,082. There are 52 night schools with an average attendance of 15,500. The city employs 4,000 teachers.

There are 3,171 men employed on the police force and 1,037 men in the fire department.

The receipts of grain, and flour in its grain equivalent during the year 1893, aggregated 246,972,966 bushels, the largest received in any year except the year 1892, the receipts for the latter year being 255,832,556 bushels; the shipments for the year aggregated 198,791,216 bushels, against 216,182,008 bushels for the previous year; the shipments of corn aggregated 78,919,781 bushels; shipments of oats, 67,129,119 bushels; of flour, 4,105,117 barrels; of wheat, 24,715,738 bushels.

The number of cars of grain inspected during the year aggregated 273,002; the quantity of grain inspected, received by canal, was 1,998,000 bushels; the largest number of cars of grain inspected in any month was 36,370 cars, inspected in September. A full statement of the quantity of grain inspected may be found on page 22 of this volume.

The week of the largest receipts of flour and grain was that which ended on May 6th, and aggregated 24,972,237 bushels, 19,051,867 bushels being of wheat; the week of the largest shipments was that which ended on April 22d when 11,134,988 bushels were shipped, embracing principally wheat and corn.

The quantity of grain in store at regular elevators at the close of the year aggregated 23,565,990 bushels.

The combined capacity of elevators made regular under the rules of this Board, is 32,800,000 bushels. A complete statement of these elevators, giving their names and the roads from which they receive grain, may be found on page 36. In connection with this subject I have prepared a statement of the capacity of public and private elevators at various places, as inquiries are often made upon this point, not only by our own members, but from other centers of trade, particularly when the market is sensitive as to the storage capacity at prominent grain points.

The receipts of live stock during the year comprised 6,057,278 hogs, 3,133,406 cattle, 3,031,174 sheep, 210,557 calves, 82,492 horses, aggregating 12,514,907 animals, valued at \$249,542,375,

and received in 273,932 cars. The valuation of our receipts of live stock from 1866 to 1893 inclusive, 28 years, amounts to \$3,950,-The receipts of sheep, viz.: 3,031,174, are the largest recorded in any year. During the week ended October 21, we received nearly 82,000, and on October 16th last, 25,690 were received. The total receipts of cattle, calves, sheep, hogs and horses in 28 years, numbered 206,753,826. In the appropriate portion of this volume may be found a full statement of the receipts in this market of these animals by roads and also by months. indebted to the Union Stock Yards company for these figures which have been compiled with great care by Mr. George T. Williams, the secretary. It is unnecessary to comment upon these They are more expressive when thoughtfully considered than a detailed description of the business which naturally flows from this enormous volume. Banking capital, railway lines, packing establishments, world-wide trade, promptness and care are the accompaniments of the business transacted at the Union Stock Yards. "To establish this market," says Mr. Williams, "with its unequaled facilities, cost millions of dollars and as a result of this enormous expenditure no other place affords the accommodations which can be had at this point."

During the year Chicago received 178,782,265 pounds of dressed beef, and shipped 1,257,581,873 pounds, as against 149,-496,436 pounds and 1,212,344,343 pounds respectively, during the year immediately preceding. The trade in this article is constantly extending and touches every market on the globe.

Our receipts of lard for the year aggregated 47,741,901 pounds, and the shipments 367,894,172 pounds, as against 68,371,502 pounds and 398,915,558 pounds respectively, for the year 1892.

Of meats other than barreled pork we received during the year, 119,599,941 pounds, and shipped 548,451,386 pounds, indicating the enormous quantity of meats packed in Chicago and prepared for shipment, supplying an extensive and a growing trade. The month of the largest shipments was that of August when 56,670,576 pounds were forwarded. Lines of transportation, both domestic and foreign, have made special arrangements for the shipment of meats in order that they may arrive in good order and that transportation lines may do their part towards maintaining this important trade centering in this metropolis. For tables in this volume showing the number of hogs packed at different points and during the winter season, I am indebted to the Cincinnati Price Current, which is recognized authority upon this subject in

the markets of the world, and to the same authority I am indebted for the statement of pork packing for a series of years in the Mississippi Valley. Detailed prices of pork, lard, cattle, hogs, sheep and beef products generally, may be found properly and systematically classified in the appropriate portion of this volume, also stocks of provisions in Chicago on specified and regular dates as reported to the registrar of provisions of this board. So full are the statistics given in this volume that it is deemed unnecessary here to amplify in regard to the course of prices or to the various changes of stocks in store. In this connection, I would direct attention to the requirements as to the cutting and packing of hog products found in the latter part of this volume published in connection with the rules, regulations, etc., of this board.

The receipts of grass seed, comprising timothy, clover, hungarian, millet, etc., during the year, aggregated 52,440,522 pounds and the shipments 72,139,009 pounds.

The receipts of flaxseed during the year aggregated 8,101,992 bushels and the shipments 7,730,641 bushels.

The receipts of lumber for the year aggregated 1,600,677,000 feet, and the shipments 719,254,000 feet; of shingles 239,575,000 feet were received and 219,705,000 feet were shipped. Tabulated statistics concerning this trade may be found on pages 96–97.

The receipts of butter aggregated 134,843,632 pounds and

The receipts of butter aggregated 134,843,632 pounds and shipments 149,142,492 pounds, against 134,196,828 pounds and 140,494,155 pounds respectively during the year 1892.

The receipts of cheese during the year aggregated 52,026,615 pounds and shipments 52,940,169 pounds, against 64,252,365 pounds and 57,665,127 pounds respectively during 1892. For full information concerning these articles I refer to page 98.

The volume of speculative grain business of Chicago during the year is indicated by the statements of the Chicago Board of Trade Clearing House, upon page 119 of this report. The total clearances for the year amounted to \$68,707,668, against \$69,295,992 in 1892, \$104,083,529 in 1891 and \$86,627,157 in 1890.

The total bank clearances of the year amounted to \$4,676,-960,968, against \$5,135,771,186 in 1892, and \$4,456,885,230 in 1891. Upon page 118 of this report may be found a statement of bank clearances, by months, from 1888 to 1893, inclusive.

The aggregate capital of the national banks of this city amounted to \$21,300,000, and of the state banks \$13,127,000. Upon pages 120 to 123, inclusive, may be found detailed statements of the official returns of Chicago's banks, both State and National.

The number of vessels arrived during the year at the port of Chicago was 8,754, representing a tonnage of 5,456,637 tons, and the number cleared 8,789, representing a tonnage of 5,449,470 tons.

WHEAT.

The year presents many features in the wheat trade of so marked a character as to render it memorable. Early in the year there was a good degree of confidence in values and a considerable buying interest was developed, advancing prices from 72% cents per bushel for the contract grade, early in January, to 77½ cents on the From this date during the balance of the month, prices declined, and on the 31st sales were made at $72\frac{8}{4}$. The market revived somewhat in February but without any pronounced improvement. In March, trading was comparatively light without marked change in prices except during its closing days, when quotations ranged from $75\frac{1}{4}$ to 78 cents per bushel, closing on the 30th at $75\frac{1}{2}$ cents. In April, after a few days of hesitation, prices advanced to 85 cents on the 11th of that month, but rapidly declined to 71 cents on During May, business was light and disclosed a growthe 29th. ing distrust in values as indications of financial disturbances multiplied. In the latter portion of the month it was evident that buyers withheld any active participation in the market. considerations controlled the June market and sales ranged at from $61\frac{5}{8}$ to $68\frac{5}{8}$ cents, closing at the lower price. The July markets were unsettled from the beginning to the end of the month. Propitious crop weather, substantial accessions to the visible supply, a tightening money market and disappointed hopes, combined to deprive the market of any strong support. In August, these conditions prevailed, with added emphasis, almost to the point of demoralization, and sales were made at unprecedentedly low figures. Some sales were reported of No. 2 spring wheat at 54½ cents in store. A dislocated foreign exchange market prevented sales of eargoes for shipment to Europe. Receipts of wheat at primary markets were quite liberal and the financial stringency was continually compelling farmers to hurry to an already overloaded market every bushel they could load regardless of prices. Cost of raising and like considerations were ruled out of the question. There was but one cry, that for money. At no time during the year did there seem to be any special desire on the part of Europe to secure supplies of our wheat. Other surplus wheat producing countries were standing behind grain-laden counters asking for purchasers, and as a consequence buyers were indifferent.

The receipts of wheat for the year aggregated 35,355,101 bushels, against 50,234,556 bushels in 1892, 42,931,258 bushels in 1891, and 14,248,770 bushels in 1890.

The shipments for the year aggregated 24,715,738 bushels, against 43,833,795 bushels in 1892, 38,990,169 bushels in 1891, and 11,975,278 bushels in 1890.

The United States exports of wheat for the calendar year aggregated 108,918,562 bushels, valued at \$79,393,172, against 124,889,199 bushels, valued at \$111,985,901 in 1892.

Exports for the fiscal year aggregated 117,121,109 bushels, of which 72,513,134 bushels were exported to the United Kingdom, as against 157,280,357 bushels exported in 1892 and 55,131,948 bushels in 1891. In 1892 the export price of wheat was \$1.03 per bushel; in 1893 it was a trifle less than 80 cents per bushel.

The following is a statement of the extreme prices each year for twenty-nine years, indicating the month in which such prices obtained:

CORN.

The quantity of corn received during the year aggregated 91,255,154 bushels, against 78,510,365 bushels in 1892. Shipments for the year aggregated 78,919,781 bushels, against 66,104,-220 in 1892. The week of the largest receipts was that which ended September 23d, and that the largest shipments was the one which closed on the 22d of April. Statements of weekly receipts and shipments may be seen on pages 24 and 25 of this volume.

Prices of the contract grade of this grain opened at $40\frac{3}{8}$ to 41 cents per bushel, and gradually acquired strength until $44\frac{7}{4}$ cents was reached. This figure, however, was not sustained many days, prices subsiding in February to $40\frac{1}{8}$ at the close of that month. March brought a shade of improvement, but not sufficient to impart confidence in better prices. This want of confidence became quite apparent in April, when the market dragged its slow length along with scarcely an animating feature in its sluggish course. Early in May came reports of damage to crops abroad, stimulating an increased inquiry for export, and prices advanced about two cents per bushel. Now came beautiful weather with flattering prospects of its continuance, accompanied by a compelling money market; and early in June 37 cents per bushel was the highest price that good No. 2 corn could command.

The trade during the summer months was not such as to call for special comment. Any slight recovery only seemed to give added momentum to a retrograde movement in prices, and at no time did the market appear to be free from the depression caused by the "left over" volume of the crop of 1892. Fine weather, financial stringency and large reserves, united in pressing down prices and in discouraging holders. The closing sales of the year were made at $34\frac{1}{2}$ cents per bushel for No. 2.

The average export price for the fiscal year was 53 cents per bushel.

The United States exports for the fiscal year aggregated 46,037,274 bushels, valued at \$24,587,511, 13,653,936 bushels of which were sent to England, 5,311,080 bushels to Germany, 2,499,914 bushels to Denmark and 2,408,667 to the Netherlands. The exports for the preceding year aggregated 75,451,849 bushels, and for 1891 30,768,213 bushels. During the calendar year of 1893, 53,825,878 bushels were exported, as against 76,641,725 bushels in 1892.

Col. Charles J. Murphy, representing the United States Agri-

cultural Department, is meeting with gratifying success in hisuntiring efforts to introduce American maize in European markets as an article of food for man. In Denmark he hasrecently been accorded a most favorable opportunity to demonstrate its palatable and nutritious qualities and to exhibit the many delicate and attractive forms in which it may be prepared for the table of the most fastidious. Its use is strongly recommended by Dr. Jurguersen, one of the noted food experts in the kingdom. Circulars have been issued by prominent merchants of Copenhagenwith various recipes in Danish, suited to the Danish taste, and are being distributed throughout Scandinavia. The efforts of Col. Murphy in England, and also on the Continent have produced satisfactory results.

HAY.

The hay market was in a special sense exempt from the unfavorable conditions which attended the trade in other articles connected with the business of this board. This exemption was not only noticeable during the panic of last summer, but it was apparent during the long period of disturbed values from 1873 to 1878. The only suggestion in this market of severe financial stress was in the average price, it being a trifle lower than for the year immediately preceding.

The receipts for the year 1893 were about 10 per cent. in excess of those for the year 1892. There seemed to be very pronounced indications that there would be a large export demand for American hay, and that it would absorb the major part of the hay crop for 1893 and result in extreme prices. This belief was soon found to be groundless, and the discovery was made before any speculative inflation entered the market. Had not this belief been corrected there would undoubtedly have been a rapid advance in prices of hay, and immediately following a severe decline which would have been injurious to the trade. There was, however, some export movement from Chicago. It probably did not exceed in value 2,500 tons and consisted mostly of prairie hay. The proposed new rate classification of hay by railway lines, to take effect on the first of January, 1894, is not looked upon favorably by the trade in this city, and it is feared that it will interfere seriously with direct shipments from Chicago to eastern points. Representations have been made on the part of our merchants to eastern railway managers, and it is hoped that they will deem it wise to reconsider their action and replace hay in the same class with grain, where it has been for many years. Our western railway lines give special hay rates, in many instances essentially lower than the rates for grain, and it seems quite reasonable that eastern railway managers should be satisfied with charging grain rates for hay shipments, and altogether unreasonable that they should demand an advance in rates at this time. Chicago is growing every year in importance as a hay market. Not only is the local trade quite large, but the care with which hay shipments are handled and the improved facilities here provided have stimulated quite a demand from eastern and southern regions tributary to Chicago. Upon page 95 may be found a statement of the prices of hay, by months, during the last year, specifying the various grades. The crop of hay for the year aggreat \$570,882,872, grown on gated 65,766,158 tons, valued 49,613,469 acres, and was the largest ever raised in this country.

The receipts of oats during the year aggregated 84,289,886 bushels, and the shipments 67,129,119 bushels, against 79,827,985 bushels and 67,332,322 bushels respectively, during 1892. On page 13 may be found a statement showing prices of this grain in this market for a series of years and elsewhere recorded in this book daily prices also may be examined. The exports of oats from the United States for the calendar year aggregated 7,052,715 bushels, valued at \$2,553,519; and for the fiscal year 2,380,643 bushels, against 9,425,078 bushels during the preceding year. The largest part of the receipts inspected, was graded No. 3 white, nearly 35,000 cars. At the beginning of the year sales were made at 30\frac{1}{8} cents per bushel and there was no material change until April, when prices ranged from 26\frac{5}{8} cents to 29 cents.

May brought a slight improvement, some sales being made in that month at $32\frac{1}{8}$ cents. The early summer conditions, financial and otherwise, affected this trade in common with that in other chief cereals, and sellers had no influence in fixing market values. In the month of July No. 2 oats sold at $21\frac{5}{8}$ cents per bushel. Cautiously, prices improved, creeping along with much hesitation and uncertainty, closing on the last day of the year at 29 cents per bushel. The crop aggregated 638,854,850 bushels, against 661,035,000 bushels in 1892 and 738,394,000 bushels in 1891.

RYE.

The market for rye has partaken of the general character of markets for other grains, and prices were in marked contrast with those which prevailed during 1892, when they were quite satisfac-The lowest prices ruled in September, when the contract grade was sold at 40 cents per bushel. The demand during the year was extremely small, particularly from distillers owing to a large supply of whisky carried over from the preceding year. The low prices of wheat lessened the demand from millers which heretofore aided in giving strength to the market. Exports too were much less than during the year preceding, owing to favorable crops in importing countries. The exports from the United States for the calendar year aggregated 763,756 bushels, valued at \$468,-761, as against 4,888,719 bushels, valued at \$4,461,053, for the year The volume of exports for the fiscal year ended June 30th, 1892. 1893, was 1,477,058 bushels, valued at \$1,002,796, and that of the preceding year aggregated 12,041,316 bushels, valued at 11,432,160. This comparison to a great extent accounts for the inactive and restricted market of this year. The crop of the year aggregated 26,555,446 bushels, valued at \$13,612,222, produced on 2,038,485 acres. Our receipts aggregated 1,707,072 bushels and shipments 1,320,013 bushels, as against 3,633,308 bushels and 2,775,600 bushels respectively, during the preceding year. Prices during the year ranged from 40 cents per bushel to 57½ cents, and closed at 45 cents on December 30th. The quantity in store at the close of the year aggregated 242,424 bushels.

BARLEY.

The barley market was in a measure exempt from the depression characteristic of the other markets. The close correspondence of the volume of the supply to that of the demand kept the

market on a uniform plane and the trade was large. During the season of lake navigation shipments were liberal. Much of the new crop was of an inferior quality but found a ready demand for mixing purposes. A considerable portion of western barley was light in weight, though sound. Most of our receipts are sold by sample and without decided or controlling reference to grade of inspection. Probably more careful discrimination is not exercised with regard to the purchase of any other grain than is exercised by the buyers of this staple, and it is handled by our commission merchants with exceptionally good judgment accounting for the prominence of Chicago as a market for barley. Our receipts aggregated 13,345,845 bushels and shipments 8,233,268 bushels. The exports from this country aggregated for the fiscal year 3,035,267 bushels, valued at \$1,468,843, as against 2,800,075 bushels and \$1,751,445 respectively, for the year preceding; the largest part of our exports being from San Francisco. The exports during the calendar year amounted in volume to 5,400,090 bushels, and in value to \$2,555,410, and those for the year preceding, to 2,150,481 bushels and \$1,139,522 respectively. crop aggregated 69,869,495 bushels, valued at \$28,729,386, produced on 3,220,371 acres. Prices ranged from 30 to 70 cents per The quantity in store at the close of the year was bushel. 38,341 bushels.

SEEDS.

The seed market has not been as much depressed as has the grain market. The exceptional inducements presented by our system of inspection and by frequent reliable statistical statements of stocks on hand, receipts, shipments, and all information regarding the general movement of seeds, render this market desirable to both consignor and buyer. Hence the market during the year has been a satisfactory one. The adoption of the cental system by the trade has been a success, and its introduction was not attended with any inconvenience.

The receipts of timothy, clover, and other seeds, excluding flaxseed, during the year, aggregated 52,440,552 pounds, and shipments 72,139,009 pounds, as against 53,228,779 pounds and 60,670,735 pounds respectively, during 1892.

An extensive demand absorbed not only our receipts but the accumulations in store from the receipts of the year immediately preceding. The conditions of foreign exchange brought about by

financial disturbances, created an unusual demand on foreign account, one gratifying effect of which, will be to bring the seed trade of this market into closer relations to foreign markets than ever before. The World's Fair presented an opportunity to our mercantile friends across the ocean to become personally familiar with the thoroughness and reliability of our system of grading and handling seed, which system commended this market in an especial manner to their attention.

As a market for timothy seed, Chicago has more than maintained her superiority, and the volume and character of the trade have more than met expectations at the beginning of the year. During the marketing time of this variety of seed, weather conditions were favorable. The export demand was steady, always finding a responsive market; and the sound financial condition of our merchants promoted shipments to this market and sustained a continuous movement from producer and shipper to distributor and local dealer.

The range of prices was not quite so high as during the preceding year, though the average was fully equal to that which then prevailed. A statement of prices may be examined in the statistical portion of this report, where may also be seen a record of receipts and shipments in tabulated form.

FLAXSEED.

The receipts of flaxseed during the year aggregated 8,101,992 bushels, and shipments 7,730,641 bushels, as against 9,473,824 bushels and 8,802,220 bushels during 1892.

Owing to the small volume of the crop of 1892 the stock at the beginning of the year was much smaller than at the beginning of 1892 when it was quite large caused by the extensive crop of 1891. When the new crop began to be marketed it met with a lively demand for export, our excellent system of inspection commending this market to the attention of the foreign trade in a marked degree. In the month of August, prices declined to a very low point, but quickly rallied to such an extent that this product in many instances was sent to market in preference to wheat, prices of which were greatly depressed. This state of things induced liberal receipts. At this time the condition of foreign exchange operated to stimulate a good export business and sustain the market. Observing the prompt absorption of the large receipts and prospects of a small crop, exporters, dealers and crushers,

bought with confidence and freedom so that a remarkable strength was imparted to the market and prices reached the highest point attained since 1890. The quality of this seed was unusally good and the market was not embarrassed by inferior grades inasmuch as they bore but a small proportion to the whole volume of receipts. The crop is estimated at about 10,000,000 bushels, as against 13,000,000 bushels in 1892 and 17,500,000 bushels in 1891.

FLOUR

A desponding wheat market imparted listlessness to the flour trade and throughout the year the demand was limited to pressing No concessions in price in the face of repeated declines in values could induce the trade to depart from the policy of buying from "hand to mouth." The year began with a fair trade, but as the season advanced, a determined dullness characterized the market, which, during the financial stress in the summer, changed to absolute apathy and quotations were almost nominal. During the remainder of the year trade did not revive to any considerable The eminently conservative policy of our flour merchants prevented any disaster to this business which otherwise might have occurred. As in past years, our statements of receipts and shipments do not indicate the entire volume of our trade, for the reason that many and large sales were made by our merchants direct from the mills, thus saving expenses of storage, insurance, etc., incident to forwarding from this city. Extremely low prices materially increased the relative demand for the patent flours. At times during the year there was a fair export demand brought about by a prospect of advance in ocean freights and by reports that crops abroad were suffering from drought, but millers were urging their holdings all the while as capital insisted upon the payment of obligations. The stock on hand January 1st, aggregated 83,000 barrels and stocks in Liverpool were quite large, aggregating 270,000 sacks, as against 125,000 the year before. The year closed with a very dull market, indeed trade was almost stagnant. closing prices for the years 1891 to 1893, inclusive, are given in the following statement:

The quantity of flour exported during the fiscal year ended June 30, 1893, was 16,620,339 barrels; as against 15,196,769 barrels exported during 1892, and 11,344,304 barrels during 1891.

Of the exports this year England took 6,586,775 barrels; Scotland, 2,475,782 barrels; Ireland, 1,299,303 barrels.

The demand from France fell off notably from 210,400 barrels in 1892, to 1,818 barrels in 1893. Germany took 54,277 barrels in 1892 and 209,719 barrels in 1893. Owing to the partial failure of the Spanish home crop of wheat the imports of flour into Cuba were increased from 366,175 barrels in 1892 to 616,406 barrels in 1893.

The growth of the flour trade of the United States with foreign countries may be understood by the following table, showing exports each year from 1870 to 1893:

The receipts of flour during the year aggregated 4,664,424 barrels and shipments 4,105,117 barrels, as against 5,919,343 and 5,710,620 barrels respectively, in 1892.

LIVE STOCK AND PROVISION TRADE.

This trade occupied, as usual, a large share of attention and was not without marked vicissitudes in a year of violent financial disturbances. Prices of cattle ranged from \$1.90 to \$6.50; of sheep from \$1.25 to \$6.25; of hogs from \$4.40 to \$8.70, per 100 lbs. and the entire receipts of live stock, aggregating in number 12,514,907, were disposed of without accumulation, and, in view of attending conditions, at not unreasonable values.

Through the kindness of Mr. George T. Williams, the Secretary of the Stock Yards, the following table, showing receipts of live stock for each year from 1880 to 1893, inclusive, is submitted:

Prices of all kinds of beef and hog product, including a great variety of cuts, may be found fully set forth in the statistical pages of this report which renders it unnecessary to present them in this review.

The trade in mess pork and lard, during the first part of the year, including the month of May, and for short ribs, including the month of March, was fairly active. August and December were dull months. A precipitous decline in the price of short ribs and of lard took place in July, and prices in that month, in August and in December, were very low. Prices of mess pork ranged from \$10.50 to \$21.60 per barrel; of lard from \$6.00 to \$13.20; of short rib sides from \$6.15 to \$10.65 per 100 pounds. The trade, taking the year through, was active in all kinds of provisions with a lively speculative feature, particularly during the earlier months. The domestic trade was less in volume than Our export trade was satisfactory. The markets of the United Kingdom, France, Germany, Belgium, Holland, Norway and Denmark, came with great regularity to this great distributing center for supplies, while Canada, South America, and the West India called only occasionally. Canned meats were in steady request from the principal foreign markets, and the local trade absorbed an unusually large volume of our product. found ready purchasers at quite favorable rates. Grease was in moderate request at prices satisfactory to sellers. The extent of our provision business may be partially comprehended from the fact that the number of employes in the slaughtering houses was from 15,000 to 20,000, according to the volume of the demand for

the product. The system of inspection by the United States government has proved advantageous to the trade. Every facility is afforded by our packers for the most rigid inspection of their methods. Such inspection is urged, as it can but establish absolute confidence in the reliability of our packing house product adapted to both foreign and domestic requirements.

Says the Chief of the Bureau of Statistics of the Treasury Department, in his last report on Commerce and Navigation of the United States: "If there was any one schedule of exports containing a number of articles in which the United States seems to occupy a position almost above competition, that schedule would be the provision schedule.

In 1892 the value of exports under this schedule was \$140,-362,159, and in 1893, \$138,461,591. Nearly the entire export is centralized in the Atlantic ports. Only about \$1,600,000 was exported from the Gulf and Pacific ports. In 1893, 86 per cent. of the total value was sent to European countries, and of this 86 per cent. (\$119,889,706) 73 per cent. (\$87,480,026) was sent to the United Kingdom."

Of bacon 391,758,175 pounds were exported in 1893 as compared with 507,919,830 pounds in 1892. Of the exports in 1893 96 per cent. or 377,279,489 pounds, were exported to Europe.

I quote again from the Chief of the Bureau of Statistics:

"Of all the hog products, lard finds the most widely distributed market. Hardly a country or colony of any commercial importance outside of Asia is omitted from the list of countries to which this article is exported. Europe received 78.5 per cent. of the exports of 1893; North America 16.6 per cent. and South America 4.6 per cent. The United Kingdom imported 138,355,415 pounds of lard from the United States, a larger quantity than in 1892 but not so large as the imports of 1891 (158,561,052 pounds), the highest ever made in one year. For lard and the imitation, the English markets depend upon the American supply.

Of 1,239,051 cwt. of lard imported in the calendar year 1892, 1,198,569 cwt. were from the United States, and 16,324 cwt. were from Canada. Of 36,991 cwt. of imitation lard, 35,858 cwt. came from the United States and 620 cwt. from Canada.

In the German markets the United States gave 85,215,100 kilograms out of the total import (special commerce) of 98,812,200

kilograms, the Netherlands ranking next with only 5,520,400 kilograms.

The remarkable fluctuations and yet progress of American lard in German markets is illustrated by the exports sent direct from the United States, which do not include a large amount which is sent indirectly through some other countries."

CONCLUSION.

The pre-eminent event of this memorable year was the World's Columbian Exposition. Representatives from every nation visited Chicago to view the exhibitions of human achievement in marvelous and instructive variety, and to study the development of human effort from its primitive results to its latest triumphs.

Chief among these triumphs was the progress attained on this continent under the inspiration of a government created and administered by the people.

I remain, my dear sir,

Very respectfully yours,

GEORGE F. STONE,

Secretary.

The total bonded indebtedness of the Board is \$1,250,000, a quarter of a million of the original amount having been paid and canceled. By this cancellation the payment of a corresponding amount of insurance premium has been saved, as under one of the provisions of the agreement attached to the bonds the Board

Your Directory has fixed the per capita assessment for 1894 at forty-five dollars, which is the same as for last year, and twenty dollars less than for 1892.

After the payment of all bills the Board has on hand in cash, \$25,972.46.

The great Columbian year necessitated some extraordinary expenditures incident to visits of many strangers from our own and foreign countries. These visitors, by whom the Board was honored, embraced many gentlemen of military, scientific and literary renown, as well as merchants of distinction from our own land, from South America and from the Old World. Correspondence upon commercial and economic subjects has resulted from these visits, which cannot fail of benefit to our institution and to the commerce of the country. At the solicitation of prominent economic associations, the Board has sent its reports, especially those containing the enunciation of its principles and the explanation and advocacy of its methods, to influential representatives of all nationalities. It was at the earnest suggestion of Dr. Wm. F. Poole, the distinguished head of the Newberry Library, that the

comprehensive reports of this great commercial organization were sent to all the great libraries of Europe, China and India. Men of letters, many of them occupying high official positions, have been commissioned by their respective governments to study our system of transacting the enormous volume of business which has made this market known in the great marts of trade throughout the world, and whose phenomenal growth has startled foreign nations. Germany, Japan and Russia, in particular, have investigated our facilities and methods, evolved by the unprecedentedly rapid development of our wonderful agricultural resources, which demand a market adjusted to the constant demands of the farmer and country grain merchant. It has been the pleasure of your Board of Directors to afford to these eminent savants every facility to prosecute their studies, and in due time we may expect elaborate and exhaustive reports concerning American, and especially western commercial methods, which will be of great value to commerce, as well as to the student of political economy. Our warehousing, state inspection of grain, weighing, transportation, banking facilities, clearing house regulations, etc., by which over 247,000,000 bushels of grain during the past year were graded, stored and put into the channels of commerce without friction and at the smallest cost to the producer, and also the complete arrangements at our stock yards for receiving and distributing over 12,000,000 head of live-stock annually, compelled the admiration of our visitors.

In its last report your Board of Directors informed this asso ciation that it would not relax its efforts to prevent the passage of the Hatch and Washburn bills, and it is a gratification to your Board to state that these bills failed of passage. Constitutional lawyers of both houses of congress strenuously opposed their enactment, and the broadest and most enlightened statesmanship prevailed. The great commercial exchanges of the country co-operated with this Board in exposing the fallacy of this proposed legislation.

Your Real Estate Committee has discharged its duties with commendable zeal. The change in the system of heating the building, explained at some length in the last report made to this association, has been completed, and has given general satisfaction. The offices of the building are now heated under a uniform system and practically without increase of cost. During the year the walls and ceiling of

the Exchange Room were cleaned and repaired. The hard wood work throughout the entire building has also been cleaned, and the roof and window frames painted. The walls and foundations of the Board of Trade Building have engaged the very careful attention of your Real Estate Committee and of the Directory, and after very thorough investigation by engineers of eminence, the conclusion has been forced upon your Board of Directors that extensive repairs and alterations are necessary to preserve the integrity of the building. As these would involve the expenditure of a large sum of money, and as your Board of Directors have not time before the close of the present administration to mature plans suggested by the investigation referred to, it prefers to leave the matter to the next administration, suggesting, however, that there be that thorough consideration which the magnitude of the work demands, before definite recommendations are submitted.

The elevators of the building have been managed with good judgment and have been courteously controlled. Your committee has succeeded, to the satisfaction of all concerned, in relieving the corridors of the crowds which inconvenienced tenants.

The expenditures in the Real Estate department throughout the year have been as follows:

Interest on bonds	\$62,737.50
Taxes	
Insurance	4,700.52
Expense of real estate department (including salaries of	
engineers, janitors, firemen, elevator men, etc.)	62,718.05

The difference between the aggregate of these amounts and that of the amount derived from rentals, which difference amounts to \$38,210.08, may be considered as the cost to the Board of Trade for the use of the Exchange Hall and all the other rooms occupied by the association.

The amount raised by voluntary subscriptions for charitable purposes during the year was \$13,918, besides large supplies of meats and of flour. The money was expended for the relief of the families of firemen killed and injured at the Cold Storage fire, and the relief of Mr. Bennett and Mr. Roswell, who were injured in the Exchange Hall by the maniac Cassius Belden; and a contribution was made to the Chicago Relief and Aid Society.

The Board also contributed \$905 for the celebration of Chicago Day in connection with the World's Columbian Exposition.

During the year various propositions have been considered to change the methods of trading now recognized by the rules of this Board and declared valid by the courts. These propositions contemplated such radical changes in the rules of the Board that your Directors, in justice to all interests, and in proper recognition of the views of some of our members, appointed a special committee whose personnel was a guarantee of ability, integrity and justice. Your committee devoted a great deal of time to the consideration of the various projects which were presented for its discussion, and has made its final report to the Board of Directors. This report has been unanimously accepted by your Directory, and it was voted that ten thousand copies of the same be published in pamphlet form for general distribution.

The present membership of the association is 1,888, the number of transfers made during the year was 163, yielding a revenue of \$4,075.

The receipts of grain and of flour in its grain equivalent aggregated 247,000,000 bushels, which exceed those of any other year except 1892. In 1880 the corresponding receipts aggregated 154,000,000 bushels.

The number of cattle, hogs and sheep received during the year was 12,221,858, valued at \$249,542,375.

The shipments of meats in various forms during the year aggregated 1,806,000,000 lbs., pork 210,000 barrels and lard 368,000,000 lbs. Detailed statistics connected with the business of the Board, including the government reports of the principal cereals and of animals on farms, etc., may be found in the Secretary's annual report.

The amount of clearances at the Board of Trade clearing house for the year was \$68,707,668, and the aggregate balances for the year amounted to \$26,896,677, a detailed statement of which may be found in the Secretary's report.

Your Committee on Transportation has been indefatigable in the discharge of its very important functions. Perhaps no subject of greater importance than that of transportation is so often presented to the consideration of the members of this association. It can not be handled to any advantage by a novice. It must receive the thought and care of those familiar with every feature of it, and of those having extensive experience in discussing transportation questions with railway officials. All claims of our members are

taken up and duly referred to Commissioner Iglehart, of the Chicago Freight Bureau, and pressed to a settlement by that efficient officer. They are not suffered to slumber in railway files and pass out of existence, but are kept alive and active until equitably adjusted. In addition to routine duties devolving upon the committee, have been the re-adjustment of the local rates and classification within the State of Illinois, as embodied in a complaint filed by the Freight Bureau before the Railroad and Warehouse Commissioners of Illinois. The case is still pending, though it has already resulted in the appointment by all the traffic associations east of the Rocky Mountains, of a joint committee to unify all existing classifications upon all less than car load classes (since enlarged to cover all classes, C. L. as well as L. C. L.) and to adopt uniform rules and regulations governing all traffic in the territory of New England, the trunk lines, the Central Traffic Association, the Western Freight Association and the Southern Railway and Steamship Asso-When this work is accomplished a great advantage will be conferred upon shippers and receivers by doing away with the constant uncertainty and frequent liability to error in rates for the transportation of property under existing conditions, and in the greater ease of doing business under a single classification and set of rules instead of under the present multiplicity of classifications and sets of rules.

The important subject of reciprocity in car and freight service has demanded diligent work of your committee. The matter is now in the hands of a special committee of the National Transportation Association. The subject commends itself to all interests since it concerns the prompt transportation and delivery of freight by carriers, and the enforcement of reasonable penalties for unwarranted delays in carrying and handling freight. To include penalties to be paid by carriers as well as by shippers, for the non-performance of duties in a prompt and business-like manner, is simply to extend the car service principle. It is obviously impossible to admit the reasonableness of proper penalties for neglect being paid by shippers or consignees, without also admitting the soundness of the principle that carriers should be held to like accountability for neglect in performing their duties. There is an accountability, which carriers have been slow to admit, of railway lines to the public, as well as an accountability of the public to railway lines.

Another prominent matter which has engaged the deliberations

of your committee, is the charging, by railway companies, of rates via Chicago, which in the aggregate are greater than the rates via Mississippi River and other gateways. Our merchants uncompromisingly insist that Chicago, the great inland metropolis of the country, situated at the head of lake navigation, shall be placed upon an absolute equality with all other specially designated gateways of commerce. The work is being prosecuted by the Freight Bureau under the direction of your committee, and it is anticipated that during this year important progress will be made in securing for Chicago recognition by railway lines as an officially designated gateway.

The Transportation Committee is pleased to observe that the members of the Board are availing themselves more generally than ever before of the facilities of the Freight Bureau in collecting claims against railways and in receiving advice with reference to transportation interests. These facilities are of great advantage to the varied interests represented in this Exchange.

The problem of switching cars in Chicago is one engaging the constant thought of your Committee, as it has particular reference to the receivers and shippers of grain and food products. It is by constant vigilance in this regard that advance in switching rates and changes in rules are prevented. The question of proper switching rates within the city limits is of great importance, and is likely to continue to perplex railway managers and threaten shippers for some time. The distances between railway junctions are so great, and the attending difficulties so complex that railway companies insist that present charges are entirely inadequate. These conditions are likely to lead to frequent efforts on the part of railway managers to advance rates, and demand continuous exertion on the part of your Transportation Committee. It is gratifying also to your committee to note that an increased amount of daily routine work has been done in the Freight Bureau for members of this Board.

Your Meteorological Committee has realized the importance of its work to members of the Board and, indeed, to interests throughout the city, and takes pleasure in expressing its entire approval of the prompt and efficient manner in which the Board of Trade weather map is drawn each morning. It is invariably furnished by nine o'clock A. M., and the committee is informed that this is better service than is accorded other trade centers, which is highly complimentary to the Chicago forecast officer. During the year

information regarding the velocity of the wind has been added to the usual list of items at the suggestion of some of the members of the Board. This Board appreciates the enterprise of the Chicago Signal Service officer in procuring on Tuesdays the snow map indicating the depth of snow in the winter and spring wheat sections; this map is not issued in Washington until Thursdays. The Monthly Crop Bulletin also is of especial service. This is received the first of the month and gives a general review of the rain and snow fall and temperature for the previous month. It also shows the condition of the wheat territory, thus furnishing information eagerly watched for and closely analyzed by members of the Board. An improvement has been made by supplementing the Weekly Crop Bulletin, issued from Washington during the crop season, with a State Service Weather Bulletin from the spring and winter wheat and corn belt sections, giving in detail the crop; condition by coun-The marine interests have not been neglected in this service, and your committee, in this connection, calls attention to the current charts of the great lakes, furnished by its direction.

Your Committee on Market Reports has given unremitting attention to its duties, and has made every effort to obtain accurate and prompt information concerning both domestic and foreign markets.

Your Committee on Flaxseed Inspection has been mindful of its responsibilities, and in consequence of the systematic arrangement for the inspection, grading, sampling, etc., of flaxseed, there have been few cases calling for special services. During the year there were 7,912,300 bushels of flaxseed received and 7,269,860 bushels shipped. The trade has been kept constantly informed by posting in the Exchange Room in tabulated and systematic form, statements of receipts, shipments, quantity in store, etc., so that our receivers as well as our buyers of this product have been placed in possession of very desirable information concerning their business. So faithfully has inspector Stevens discharged his important duties that an appeal is very seldom taken from his decision.

Your Committee on Legal Advice has had frequent meetings to consider constantly arising questions involving to a greater or less extent legal points. It has often had occasion to consult with reference to possible action by the Board of Directors and also with reference to proposed changes in the rules and regulations of the Board, in order that such form and phraseology might be

employed as should conform to established principles, in view of avoiding unnecessary litigation and expense.

Your Committee on Rules has frequently found it necessary to act in conjunction with your Committee on Legal Advice, and in proposed amendments to the rules of the Board the interests of the members particularly connected with such proposed amendments have been consulted with great care, and proposals for changes have not been made with undue haste.

Your Committee on Finance has regularly convened to inspect bills against the Board, and to pass upon all expenditures. It has regularly presented its monthly statement, verified by an expert accountant.

Your Committee on Rooms has been frequently called upon to discharge its delicate and onerous duties. It has kept in mind the courtesy which the Board owes to visitors, not forgetting the rights and privileges of members.

Your Committee on Clearing House has been in constant touch with the department under its charge and has kept the Directory fully informed by frequent reports.

The Warehouse Committee has been called upon for important service, as by the rules of the Board a yearly examination of warehouses is necessary. The duties of the committee have been scrupulously discharged and the reliability of grain receipts issued by warehouses declared regular under the rules of this Board is unquestioned.

Your Committee on Weighing has been frequently appealed to, and its delicate duties have been acceptably discharged. Few controversics have arisen which have called for any special session of the various inspection committees, which fact attests the fidelity of our official inspectors.

Your Committee on Membership has had weekly sessions for the examination of applicants for admission to this Board. Your committee has kept constantly in view the supreme importance of sustaining the character of the membership of this association. The duties of this committee are among the most important connected with this Exchange.

Your Board of Directors appointed a committee to call upon the Railroad and Warehouse Commissioners for the purpose of rendering such assistance as might be desired, and of promoting that ordial co-operation which has always existed between the State

of Illinois and this Board regarding affairs of mutual concern. The conferences between the commissioners and the committee have been conducive to the business of grain dealers.

The number of deaths during the year was twenty-six, including two ex-presidents of the Board, David H. Lincoln and George M. How. Mr. Lincoln was a gentleman who performed every duty with scrupulous exactness. He exercised a wide charity toward his fellows, and in his years of feeble physical condition he exhibited a patience and heroism that adorned his days and were a constant inspiration to those about him. He was unselfish, and possessed of an unfailing native politeness; he never could cherish an unkind thought. Mr. How was identified with the Board from its earliest history, and retained a deep interest in it to the date of his decease. He was well versed in the traditions. principles and legislation of the Board, and was frequently consulted by his fellow members upon matters of general interest. He was always loyal to the highest mercantile standards and proud of the good name and dignity of this association. He was neither narrow nor selfish, and was, without exception, urbane in his demeanor, both personal and official. Our social and commercial circles will feel the loss of his refinement, large-mindedness and faithfulness. We deplore his departure. This Board holds its faithful servants in grateful and sacred remembrance and will always be jealous of their good name.

Your Directory deems it appropriate to call especial attention to the Mutual Benefit Association, a voluntary body formed within our membership. This association commends itself to our members, as its objects appeal to our highest instincts. None can be sure of escaping the day of misfortune, and no accumulations of property are beyond the reach of financial decay and ruin. There is no more sacred duty, no greater privilege than the duty and privilege of providing for our own households against that day of want which time may bring. With reference to this association the Board of Directors unanimously adopted the following preamble and resolution:

WHEREAS, The Directors of this Board realize the great value to be derived by its members from an economical and safe form of life insurance,

Resolved, That this Directory, having investigated the proposed plan of the Board of Trade Mutual Benefit Association, and found

it to be, in their opinion, a safe and wise one, do hereby give it their approval, and recommend it to the attention of those members who may desire such form of insurance.

While the business of this Board has not been unaffected by the mercantile gloom which has extended over the world, we have to congratulate ourselves that, dealing as we do with the actual necessities of life, we are never without an active market. Those extensive supplies, as unfailing and beneficent as seedtime and harvest, annually poured into our lap from the great Mississippi Valley, and a constant demand for meat foods and bread-stuffs, unite in insuring to the members of this association a business which is, to a considerable extent, exempt from financial depression-

It is no small gratification to your Board of Directors that after two eventful years, during which the very existence of this and kindred bodies has been threatened by proposed hostile national legislation, and serious commercial and financial conditions have disturbed the business of the country and of the world, it is able to hand to you an unimpaired charter, and rules, regulations and methods governing your transactions, intact.

Respectfully submitted by the Board of Directors.

CHARLES D. HAMILL,

President.

Treasurer.

ADDRESS OF CHARLES L. RAYMOND, PRESIDENT.

Gentlemen of the Board of Trade:

I thank you for the honor of an election to the highest office within your gift, and in assuming its duties I am not unmindful of its responsibilities.

The building and property of the Board and its constantly increasing commerce require great care and attention from its officers, and they should have your hearty co-operation and support.

It is difficult to estimate the importance of the actual cash business transacted by our members. During the past year we have shipped for actual consumption and for export, more than 180,000,000 bushels of grain, 4,100,000 barrels of flour, 956,000,000 pounds of pork product, and 1,257,000,000 pounds of beef and beef product, aggregating a value of not less than \$250,000,000, making this the leading market of the world in grain and provisions. The magnitude of this business and the infrequency of legal or arbitrary disputes are evidence of the high commercial standing of our members, and it should be our united care that the highest standard of business honor and integrity be maintained.

The system of trading for future delivery is the outgrowth of our business and fills its requirements. Under this system capital is attracted to buy property for cash and re-sell for future delivery, thus affording facilities for buyers to meet the meet the wants of their trade in providing for the future, without the expenditure of large sums of money, until such time as the actual goods are required for consumption.

The farmer and grain buyer in the interior can purchase grain, the packer can manufacture provisions, and by selling for future delivery exercise a protecting power over his ventures and at the same time act as the banker for the jobber who buys for future in anticipation of an actual consumptive demand.

Out of this system, necessary in itself for the general trade, has grown the speculative element which has made ours the great speculative market it is to-day.

No legislation should be attempted to regulate this future trading. It will find its own level and regulate itself, but if a

limit could be placed to the length of time in the future for which trades could be made, say sixty days, and other exchanges would join with ours in this matter, it would in a measure, curtail the great quantity of grain at times thrown on our markets for long deferred future deliveries, allow sufficient time for grain to arrive from interior points and for packers' meats to cure, and at the same time give the farmer, grain buyer, commission merchant, speculator and broker, more active and better markets, and afford the carrier equal facilities. Thus in January, let trades be for January and February; in February, for February and March, and so on, bringing about a day of delivery every month. shipper and exporter could then procure cash grain for shipment at reasonable prices relative to the market for the future, and no national legislation would be proposed to govern our methods; thus such legislation might be turned toward the suppression of so-called bucket shops—those parasites on our commerce, so detrimental to public policy and so injurious to the interests of the producer.

Our Board of Trade building is in a somewhat doubtful condition of security. Great care should be exercised, and the most skillful engineers consulted before incurring any expenses for repairs or reconstruction.

Our Board as well as the business community at large has passed through a year of unusual depression such as visits us only at long intervals. Let us hope that wise and prompt tariff legislation may give the commercial world such renewed confidence that a year hence we may congratulate ourselves on a prosperous past.

No. 2 spring wheat shall be sound, reasonably clean and of good milling quality.

No. 3 spring wheat shall include all inferior, shrunken or dirty spring wheat weighing not less than fifty-three pounds to the measured bushel.

No. 4 spring wheat shall include spring wheat damp, musty, grown, badly bleached, or for any cause which renders it unfit for No. 3.

White spring wheat—The grades of Nos. 1, 2 and 3 white spring wheat shall correspond with the grades of Nos. 1, 2 and 3 spring wheat, except that they shall be of the white variety, or shall contain 5 per cent., or more, of such white wheat.

Black Sea and Flinty Fife wheat shall in no case be inspected higher than No. 2, and rice wheat no higher than No 4.

Frosted wheat—shall in no case be graded higher than No. 4, except that the grade of No. 3 may contain as much of said frosted wheat as it is customary to allow of wheat damaged in any other way.

RULE III.-MIXED WHEAT.

The grades of Nos. 2 and 3 mixed wheat shall be equal in quality to the grades Nos. 2 and 3 red winter wheat; except that they shall include mixtures of spring and winter wheat.

RULE III.-CORN.

Yellow. No. 1 yellow corn shall be yellow, sound, dry, plump and well cleaned.

No. 2 yellow corn shall be three-fourths yellow, dry, reasonably clean, but not plump enough for No. 1.

No. 3 yellow corn shall be three-fourths yellow, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.

White.

No. 1 white corn shall be sound, dry and plump, and well cleaned.

No. 2 white corn shall be seven-eighths white, dry, reasonably clean, but not plump enough for No. 1.

No. 3 white corn shall be seven-eighths white, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.

No. 1. No. 1 corn shall be mixed corn of choice quality, sound, dry and well cleaned.

No. 2 corn shall be mixed corn, dry, reasonably clean, but not good enough for No. 1.

No. 3 corn shall be mixed corn, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.

No. 4. No. 4 corn.—Corn that is badly damaged, damp or very dirty shall be graded no higher than No. 4.

No. 5 barley shall include all barley which is badly damaged, or No. 5. from any cause unfit for malting purposes; except that barley which has been chemically treated shall not be graded at all.

The grades of Nos. 1, 2 and 3 Scotch barley shall correspond in Scotch all respects with the grades of Nos. 1, 2 and 3 barley; except that they shall be of the Scotch variety.

The grades of Nos. 1, 2 and 3 Bay Brewing barley shall conform Bay Brewing in all respects to the grades of Nos. 1, 2 and 3 barley; except that they shall be of the Bay Brewing variety grown in the territories and on the Pacific coast.

The grades of Nos. 1, 2 and 3 Chevalier barley shall conform in Chevalier. all respects to the grades of Nos. 1, 2 and 3 barley; except that they shall be of the Chevalier variety grown in the territories and on the Pacific coast.

RULE VII.

The word "new" shall be inserted in each certificate of inspection of a newly harvested crop of oats until the fifteenth day of August; of rye, until the first day of September; of wheat, until the first day of November, and of barley until the first day of May of each year.

This change shall be construed as establishing new grades for the times specified, to conform to the existing grades of grain in all particulars, excepting the distinctions hereby established between the new and the old crop, and shall apply to grain inspected from store for two months after the times respectively above specified.

RULE VIII.

All grain that is warm, or that is in a heating condition, or is otherwise unfit for warehousing, shall not be graded.

RULE IX.

All inspectors shall make their reasons for grading grain, when necessary, fully known by notations on their books. The weight alone shall not determine the grade.

RULE X.

Each inspector is required to ascertain the weight per measured bushel of each lot of wheat inspected by him and note the same on his book.

ADMINISTRATION AND WAREHOUSE REGISTRA-TION.

Extracts from the rules adopted by the Railroad and Warehouse Commissioners for the administration of the departments of grain inspection and warehouse registration in the city of Chicago in force from and after November 1, 1889:

"Plugged,"
"Loaded," or
"Scoured" grain.

"The said Chief Inspector, and all persons inspecting grain under his direction, shall in no case make the grade of the grain above that of the poorest quality found in any lot of grain inspected, when it has evidently been "plugged," or otherwise improperly "loaded," for the purpose of deception. Wheat which has been subjected to "scouring," or to some process equivalent thereto, shall not be graded higher than No. 3."

Attempts at fraud, or

"All persons employed in the inspection of grain shall promptly interference. report to the Chief Inspector, in writing, all attempts to defraud the system of grain inspection established by law, and all instances where warehousemen shall deliver, or attempt to deliver, grain of a lower grade than that called for by the warehouse receipt."

> "They shall also, in the same manner, report all attempts of receivers or shippers of grain, or any other person interested therein, to instruct, or in any improper way to influence the action or opinion of any inspector in the discharge of his duty; and the Chief Inspector shall report all such cases to the Commission."

> Extracts from the Law of Illinois, Revised Statutes, Chapter 114, Section 138:

> "Any duly authorized Inspector of Grain who shall be guilty of neglect of duty, or who shall knowingly or carelessly inspect or grade any grain improperly, or who shall accept any money or other consideration, directly or indirectly, for any neglect of duty, or the improper performance of any duty, as Inspector of Grain, and any person who shall improperly influence any Inspector of Grain in the performance of his duties as such Inspector, shall be deemed guilty of a misdemeanor, and, on conviction, shall be fined in a sum of not less than \$100, nor more than \$1,000, in the discretion of the Court, or shall be imprisoned in the county jail not less than three, nor more than twelve months, or both, in the discretion of the Court."

Note.—Prior to the year 1820 no official records of the arrival of alien passengers were kept. It is estimated, however, that the total number arriving in the United States from the foundation of the government to the year 1820 was 250,000.

Up to the year 1856 no record was kept of immigrants in distinction from the arrival of

alien passengers.

The total number of European emigrants for the last fiscal year was 488,832.

Of the total number of immigrants for the year 315,845 were males and 187,072 were females. The year ending June 30th, 1882, was the year of the greatest immigration.

Owing to the absence of law for the collection of statistics in relation to immigrants by railroads, those from the British North American possessions and from Mexico are not included since July 1, 1885.

NOTE.—Up to 1850 only the aggregate valuations in the several counties were reported to the State officers, and from 1852 to 1857, inclusive, a few counties returned only the aggregates; hence the details of real estate and personal property valuations are not complete for those years. In 1867 and 1868 the details of valuation are not entirely correct, owing to changes by the operation of the equalization law. Since 1868 the valuations are as equalized. The total valuations in each of the several years are correct and official.

The valuations for 1873 as equalized are largely in excess of any previous year. In 1874 some changes were made in the manner of equalizing the assessments, resulting in reducing all the valuations, especially those of railroad property.

The State debt, as noted, represents it as it stood on the 1st of January in each of the several years to 1869; in 1869 and 1870, as it stood December 1; in 1871, as it stood December 31; from 1872 to 1879, as it stood December 1.

CHICAGO REAL ESTATE AND PERSONAL PROPERTY.

NOTE.—From 1851 to 1862, inclusive, a lamp tax of half a mill to two mills was levied on certain portions of the city, and is inclusive; on April 1 in 1862 to 1864. The city debt as noted represents it as it stood on February 10 in 1854, inclusive; on February 1 in 1855 to 1861, inclusive; on April 1 in 1862 to 1874, inclusive; and on Dec. 31, since 1874. Valuations for 1875 to 1883, inclusive, are by the county assessment, as equalized by the State Board of Equalization, and in some of these years do not include railroad property. The city tax on railroad property for 1882 and 1883, something over \$100,000 for each year, is not included in the above total tax. The above figures for 1889 include the districts annexed to the city of Chicago July 15 of that year.

During the past year quite a number of steamers cleared with large cargoes and partcargoes of grain, ranging from one hundred thousand to one hundred and sixty thousand bushels each, but special mention might be made of the steamer Samoa, which departed for Liverpool on February 4th, 1893, with the following:

164,383 bushels of wheat. 15,415 pieces of oak staves. 10,594 sacks of cotton seed oil cake. 8,690 sacks of cotton seed meal. 7,782 bales of cotton. 27 hickory logs. 27 bales of moss.

She also had on board 1,300 tons of coal. This constituted the largest cargo that ever cleared from New Orleans.

The next in importance was that of the steamer Montezuma, which cleared for Liverpool December 9th, 1893, with a cargo of

12,220 bales of cotton. 21,000 bushels of corn.

1,200 pieces of oak staves. 149 sacks of wheat.

Cotton being the principal item of this cargo.

NOTE—In the above table the estimated yield per acre was, up to 1884, that of the best authorities, helped by a calculation of the results in the following years the Government figures have been adopted. In estimating the rate of consumption the conventional rate of 5% bushels per capita is taken up to 1880-81, since when the rate of 5.6 bushels per capita has been assumed, such being considered nearer the actual consumption.

In determining the value of property under this Rule, its value in other markets, or for manufacturing or consumptive purposes in this market, together with such other facts as may justly enter in the determination of its value, shall be considered irrespective of any fictitious price it may at the time be selling for in this market. Such value, for the purposes of this Rule, in case of disagreement, shall be determined by the Board of Directors, and communicated to the parties in interest through the President or Secretary.

RULE XXI.

REGULAR DELIVERIES.

Tender of warehouse receipts.

Requirements of regular warehouse receipts.

SECTION 1. All deliveries upon contracts for grain or flax seed, unless otherwise expressly provided, shall be made by tender of regular warehouse receipts, which receipts shall have been registered by an officer duly appointed for that purpose. All such warehouse receipts shall be made to run five days from date of delivery on regular or customary storage charges, which regular or customary charges shall follow such warehouse receipts and be chargeable upon the property covered by the same, and shall be issued by such houses as have complied with the Rules of the Board of Trade and the Regulations and Requirements of the Board of Directors, and have been declared regular warehouses for the storage of grain or flax seed by said Board of Directors; and it shall be the duty of the Board of Directors, prior to the first day of July in each year, to inspect all warehouses the proprietors or managers of which shall apply to have their receipts declared regular for delivery on contracts under the Rules of the Board of Trade, and no warehouse shall be declared a regular warehouse unless it is conveniently approachable by vessels of ordinary draft and has customary shipping facilities, and unless the proprietors or managers of such warehouse are in good financial standing and credit, and are carrying on and intend to continue to carry on the legitimate business of public warehousemen under the

laws of the State of Illinois and in accordance with the Rules of the Board of Trade of the City of Chicago and the Regulations and Requirements of the Board of Directors; nor until the proprietors or managers of such warehouse shall file a bond with sufficient sureties in such sum and subject to such conditions as may be deemed necessary by the Board of Directors, under the Rules of the Board of Trade and the Regulations and Requirements of the Board of Directors in reference to warehouses.

Warehouse receipts for warehouses so declared regular by the Term for Board of Directors shall be regular for delivery on contracts under regular. the Rules of the Board of Trade so long as the said warehouse shall continue to be a regular warehouse, but the term for which any warehouse is declared a regular warehouse to issue such receipts shall be limited to and expire on the first day of July in each year. No receipts issued on grain received in any warehouse shall be regular for delivery under the Rules of the Board of Trade after that date unless the warehouse upon which it has been issued has again been declared a regular warehouse by the Board of Directors; provided, however, that receipts issued before the first day of July by warehouses which have been regular warehouses during the preceding year, but which have not been declared regular for the succeeding year, shall be regular for delivery upon such contracts for sixty days after the first day of July; but nothing contained herein shall prevent the Board of Directors from declaring any warehouse, or the receipts thereof, irregular at any time for violation or non-compliance with the laws of the State of Illinois or any of the Rules of the Board of Trade or of the Regulations and Requirements of the Board of Directors.

Provided, that the Board of Directors shall have power, when in Other storage their judgment an emergency exists requiring more storage room room may be provided in than can be supplied by the regular elevator warehouses, to declare case of any storehouses, vessels, or places suitable for the storage of grain or flax seed within the city limits—wherein the cost of delivery to vessels or railroad cars shall not be greater than such as is made by the regular elevators for the same service—to be regular places for the storage of grain deliverable under the Rules of the Board of Trade.

Such delivery notice may be passed from one purchaser to another, before 2 o'clock P. M., by indorsement thereon, by the seller, of the name of the party to whom it is to be delivered, together with the contract price at which the property is sold, and also the time at which the delivery is made. The first delivery of such notice shall be made before 1:35 o'clock P. M., and any party holding such notice longer than five minutes, as shown by the indorsements on same of the time of the previous delivery, shall not be permitted to deliver it. All delivery notices issued under this Rule shall be consecutively numbered by the parties issuing them. Notice of readiness to deliver property as herein provided, and all subsequent transfers of such notices, shall be deemed and held to be a valid and sufficient tender of property, on time contracts, under the Rules of this Board of Trade, provided the property is actually delivered, or is shown to have been ready for delivery, in the manner and upon the terms herein provided. It shall be the duty of the party regularly holding such notice at 2 o'clock P. M., to present the same at the office of its issuer before 2:30 o'clock P. M., of the same day, together with a certified check on some Chicago bank, in good standing, or other satisfactory payment for the net amount due for the property represented by said notice at the market price; and upon tendering said notice, with payment, at the office of its issuer, the holder of said notice shall be entitled to receive the property represented by same. All differences due from or to parties to such delivery shall be paid upon the basis of a full delivery, and no more, and each purchaser receiving notice of delivery shall be responsible to the seller from whom the notice was received for the difference between the price actually paid for the property and their contract price. In cases where the seller's contract price is less than the price actually paid for the property, such seller shall be responsible to the purchaser to whom he delivered the notice, for the difference. All such differences shall be due and payable immediately upon the delivery and payment for the actual property; it being the duty of each person transferring the delivery notice to ascertain what price was actually paid for the property.

On the first business day of each month all deliveries on time contracts of the kinds of property mentioned in this section, if delivered before 11 o'clock A. M., shall be delivered in the Exchange hall, or such other place as may be designated by the Board of Directors, between the hours of 8:30 and 9:15 o'clock A. M., in the same manner and under the same regulations, except as hereinafter provided, as is specified for similar deliveries after 11 o'clock. The delivery notice shall be of the same form and character in all respects as that prescribed for deliveries between 1:30 and 2 o'clock, except that it shall state the net value (deducting extra storage) of the property at the closing market price on the last business day of the previous month, for the delivery on which the property is tendered, which price shall be posted on the bulletin board of the settlement room immediately after the close of the market. The first delivery of the notice shall

not be later than 8:35 o'clock, and it shall be the duty of the party property to be regularly holding such notice at 9:15 o'clock to present the same at how. the office of its issuer before 11:00 o'clock A. M. of the same day, together with a certified check on some Chicago bank, in good standing, or other satisfactory payment, for the net amount due for the property represented by said notice, as hereinbefore provided, and upon tendering said notice with payment at the office of the issuer, the holder of such notice shall be entitled to receive the property

CARTAGE OF FLOUR.

In the absence of special agreement to the contrary, it is estab-cartage in lished as a regulation of trade that in sales of flour any cartage for special moving the property from where it is at the time of sale shall be paid agreement. by the buyer.

REGULATION XIII.

REPEAL OR AMENDMENT OF REGULATIONS.

No change shall be made in these regulations or recommenda-Repeal or tions by the Board of Directors before submitting the same to a meeting, properly called, of the members of the Board of Trade that are interested in the flour trade, in which ten shall constitute a quorum.

RECOMMENDATIONS.

T

The Committee on Flour Inspection recommend to millers and Flour in shippers of flour the following requirements of standard sacks:

sacks, requirements.

NO. 140-JUTE EXPORT SACKS

Shall be from the best material, double stitched, not using less than an equivalent to 40x49 inch mangled or craped finished material, weighing not less than 12 ounces per yard of 40 inches in width, or 15 ounces for the complete bag. If from starched or sized material, the complete bag should not weigh less than 16 ounces.

NO. 280-JUTE EXPORT SACKS

Shall be from the best material, double stitched, not using less than an equivalent to 50x63 inch mangled or craped finished material, weighing not less than 15 ounces per yard of 50 inches in width, or 25 ounces for the complete bag. If from starched or sized material, the complete bag should not weigh less than 26½ ounces.

Seamless jute sacks must be from same weight and quality of material, etc., but require 4 per cent. less material, and may weigh 4 per cent. less.

140 POUND COTTON EXPORT SACKS

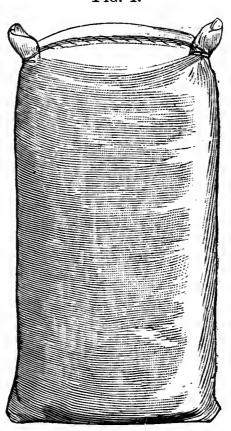

Shall be double stitched, best Twill Drill, Osnaburg or Duck, free from starch or sizing, using of Twill or Drill not less than an equivalent to 40x47 inches, or, if Osnaburg or Duck, not less than $37\frac{1}{2}x51\frac{1}{2}$ inch material, the complete bag weighing not less than $9\frac{1}{4}$ ounces.

II.

How to close sacks.

The Committee on Flour Inspection also recommend to millers and shippers of flour in sacks to be inspected in this market, that in closing the sack the mouth edge of the sack be turned in without rolling, and sewed with a single seam, the stitches to be at least 1½ inches apart. (See Fig. 1.) This will allow the Inspector to insert the trier between the stitches without making holes in the cloth.

Fig. 1.

III.

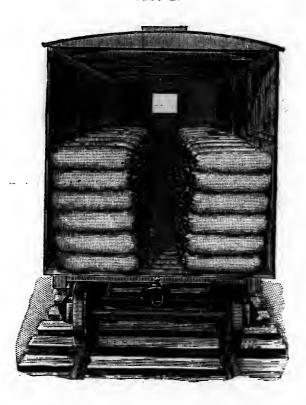

How to load

The Committee on Flour Inspection further recommend to millers, shippers of flour, and railway agents, that in loading cars the following instructions be observed:

One hundred and forty pound sacks should be piled in two tiers lengthwise of the car, the mouths of sacks placed toward center of car (see Fig. 2), leaving the space between the tiers of sacks in the center of the car free and clear for the convenience of the Inspector.

The sacks of flour should be piled as follows: The sacks on the floor to be placed four inches from the side walls of car, and sacks so piled as to gradually incline to the walls of the car until the top rows press strongly against the said walls, as shown in Fig. 2.

Fig. 2.

Unless these recommendations be complied with the Inspector will charge for the labor necessary to put the flour in proper position for inspection.

EXTRACTS FROM THE RULES.

PRESCRIBED BY THE BOARD OF RAILROAD AND WAREHOUSE COMMISSIONERS FOR THE ADMINISTRATION OF THE DEPARTMENTS OF GRAIN INSPECTION AND WAREHOUSE REGISTRATION IN THE CITY OF CHICAGO, AND IN FORCE FROM AND AFTER DECEMBER 3, 1887.

"PLUGGED," "LOADED" or "SCOURED" GRAIN.

The said Chief Inspector, and all persons inspecting grain under his direction, shall in no case make the grade of the grain above that of the poorest quality found in any lot of grain inspected, when it has evidently been "plugged," or otherwise "improperly" loaded for the purpose of deception. Wheat which has been subjected to "scouring," or to some process equivalent thereto, shall not be graded higher than No. 3.

ATTEMPTS AT FRAUD OR INTERFERENCE.

All persons employed in the inspection of grain shall promptly report to the Chief Inspector in writing all attempts to defraud the system of grain inspection established by law; and all instances where warehousemen shall deliver, or attempt to deliver, grain of a lower grade than that called for by the warehouse receipt.

They shall also, in the same manner, report all attempts of receivers or shippers of grain, or any other person interested therein, to instruct, or in any improper way to influence the action or opinion of any inspector in the discharge of his duty; and the Chief Inspector shall report all such cases to the Commission.

CLAIMS FOR DAMAGES.

No claim for damages on account of alleged error in the inspection of any grain (except grain inspected from public warehouses in accordance with law), will hereafter be entertained or allowed by the Board of Railroad and Warehouse Commissioners, unless complaint of such inspection shall be made to the office of the Chief Inspector of Grain before the grain in question shall have left the jurisdiction of the Department.

EXTRACTS FROM THE RULES.

FOR THE GOVERNMENT OF THE ASSISTANT INSPECTORS AND HELPERS, ESTABLISHED BY THE CHIEF INSPECTOR AND APPROVED BY THE BOARD OF RAILROAD AND WAREHOUSE COMMISSIONERS, AND IN FORCE FROM AND AFTER DECEMBER 3, 1887.

RULE I.

HOURS OF SERVICE.

Assistant inspectors and helpers will be at their posts and ready for business on the railroad tracks or at the elevators to which they are assigned, from 7 o'clock A. M. until 6 o'clock P. M. of each day, from the 15th day of March to the 15th day of November, and from 8 o'clock A.M. until 5 o'clock P. M. during the remainder of the year.

RULE II.

EARLIER HOURS.

When the receipts are large and the interests of the trade require an earlier inspection, all assistant inspectors and helpers assigned to duty on the track will begin work at as early an hour as practicable.

RULE III.

EVENING WORK.

Inspectors stationed at elevators will, when necessary to complete the cargo or shipment upon which they may be engaged, remain on duty as late in the evening as they can see to inspect grain safely.

BULE IV.

It shall be the rule that a bale of hops shall weigh not less than one hundred and seventy-five (175) nor more than two hundred (200) pounds; but the tender or delivery of any lot of hops on a sale or a contract, averaging one hundred and eighty-five (185) pounds to one hundred and ninety-five (195) pounds shall be deemed a compliance with this rule.

Sacking.

Second. The sacking of hops shall not weigh more than twenty-four (24) ounces per yard, and seven (7) pounds shall be deducted from the weight of each bale as tare; and any additional weight of sacking, or any extraneous matter, shall be considered as irregular, and the seller be liable to the purchaser for such excess.

Marks on bales. Third. Each and every bale of hops sold must be marked with the growers' name or initials, and the name of the State where the hops have been raised, and the year produced.

REGULATIONS

OF THE

Clearing House of the Board of Trade of the City of Chicago.

I.

The style and address of the business houses making clearings must be registered at the Clearing House, and any subsequent change in address reported.

II.

Printed reports to show the net balances, as provided in General Rule No. XXII, Section 6, Paragraph 2, must be obtained at the Clearing House.

III.

Parties whose reports shall show a net balance against them shall accompany the report with a check for the said net balance, made payable to the order of Chicago Board of Trade Clearing House. Such check must be certified, under penalty of a fine of one dollar. No money will be accepted, but the checks of the Clearing House may be used in payment of balances.

IV.

All reports must be in the Clearing House by 11 A. M., of each business day, under penalty of a fine of five dollars if tardy, and the posting of the delinquent party on 'Change at 12 M., except on days when the exchange room is closed at 12 o'clock M., when the names of delinquents shall be posted at 11:30 A. M.

V.

Parties having no items to clear must so report in writing, under penalty of a fine of one dollar for neglect of such report; and parties whose reports may be equal on both sides, and those whose reports show a credit balance, must put them in the Clearing House, under penalty, as provided in Art. IV above.

N. B.— To insure accuracy and expedite the clearings, parties must be sure the amounts claimed are mutually agreed upon and correct. A penalty of one dollar will be collected of any party claiming from or allowing to another party a wrong amount, and also for each error in footing or subtraction. All doubtful items must be excluded from the report.

VI.

If a claim is not allowed by the debtor party, the claimant must, on notice thereof, pay to the Clearing House by certified check the amount claimed; such payment to be made before 2:15 P. M., under penalty of a fine of five dollars.

VII.

In case a party, in his report, allows another party an amount in excess of that claimed by the second party, the excess will be refunded to the first party.

VIII.

The charge for clearing, as provided by the Rules, has been fixed at one cent for each item in each report, the same to be paid monthly on presentation of the bill by the Clearing House. Fines to be paid at time of notification that the same have been incurred, under penalty of the withholding of the next amount due such debtor or reporting the delinquency to the Board of Directors.

IX

Parties whose reports show a net balance in their favor may call for check after 2:30 P. M.

X.

No reports shall be amended after 11 A. M.

XI.

Office hours shall be from 9 A. M. to 3:30 P. M.
